These apples really come into their own in the kitchen and are ideal for cakes and stewing. Of course, you can also enjoy these aromatic fruits in their purest form - and just bite right in!

Taste the difference

We want to make sure that our fruit and vegetables are the best you can get. That is why:

- The experienced SanLucar master growers from over 30 countries only grow fruit in regions where they have always flourished and tasted the best.
- SanLucar fruit is only harvested by the trained pickers when it is really ripe, often in multiple harvesting sessions. Our patience and the high cost of our care are well rewarded – with an even better flavor!
- Years of cooperation with our carefully selected master growers ensure the highest quality in our fruit and vegetables. Our strict inspection system reconfirms this every day.
- Fair play is our top priority in dealing with others. This is why we create optimum working conditions, offer our master growers long-term contracts, and pay them fairly.
